

APCO Report-Out

June 8, 2022

1. **District Recruitment Activity.**

- The District is in the final phase of filling its last vacancy, which is the Air Quality Specialist position. We had thirteen qualified candidates apply and have advanced four for final consideration. We are currently reviewing references and performing background checks and hope to onboard the new team member soon.
- At our upcoming August 10th Board meeting we will likely request the Board for permission to “dual-fill” our Air Quality Engineer (AQE) position currently held by Alex Saschin. Alex anticipates retirement around March 2023. Dual-fill is a transition tool that allows an outgoing person to train and work with the new incoming person that replaces them, simultaneously, under the same (AQE) position. The AQE is a very important position to District operations and the dual-fill provides for the training and hand-off of institutional knowledge. Pending dual-fill approval in August, a recruitment for the AQE would start soon thereafter.

2. **CALeVIP and District EV Infrastructure Programs.**

- The District partnered with Sonoma Clean Power to bring CEC funding for EV infrastructure to Sonoma and Mendocino counties under the CALeVIP program. The “Sonoma Coast” project brings \$6M of funding to Sonoma County with a minimum of 25% of funded projects in rural/unincorporated areas. The District only funds projects in its territory and is funding \$150,000. Attached is the current CALeVIP project status with current location and infrastructure details.
- The District currently has a public charging project underway, to be funded through its GoGreen! Program for a Level 2 charging project in the Healdsburg, Alexander Valley area.
- District staff will bring forward and propose new GoGreen! Program amendments to add “Transportation Electrification” options and to increase funding for EV charging infrastructure projects. These will be community facing grant programs with funding for three \$50,000 projects.

3. **School Bus Grant Opportunity.**

With funding from the Bipartisan Infrastructure Law, EPA’s new Clean School Bus Program provides \$5 billion over the next five years (FY 2022-2026) to replace existing school buses with zero-emission and low-emission models. EPA is offering \$500 million through the [2022 Clean School Bus Rebates](#) for zero-emission and low-emission school bus rebates as the first funding opportunity. The program does not run through the air districts, but we are working to get the word out; please share with your schools. Attached is a recent ARB list of school buses in the District and their age.

4. **Next General Board Meeting: August 10, 2022.**

CALeVIP - Sonoma Coast Incentive Project
